Assignment recovery

Pending AssignmentRecovery records: **0**. Offline recovery was not needed. No application writers ran against the restored database.

GridFS file-byte verification: not testable

Both the source and restored archive contain **zero files and zero chunks**. There was no uploaded file available to download and compare. File recovery is therefore untested.

Source counts were unchanged between the before and after checks. Count equality does not establish equality of every document or application behavior after recovery.

Evidence sources: report.json, archive-check.json and the original mongorestore.log saved during verification.
